Description

The design supply and installation of Granite plinths and Bath stone to the ground and first floor of a new development in Knightsbridge, London.

The works involved:

- The work consisted of visiting site to take details and subsequently the production of working drawings.
- We resourced and supplied new granite and Hartham Park stonework, along with fixings, corbel plates, DPC's, and wall insulation.
- The works involved new ashlar walls, columns, soffits and included a new main entrance.
